Tools and Technologies

1. Python
2. Flask
3. Git
4. JIRA
5. Pytest
6. Selenium
7. Linux (Ubuntu)
8. Bash
9. OSI Model (TCP/IP)
10. nslookup
11. Routing
12. Apache
13. Nginx
14. Jenkins
15. Docker
16. Docker Hub
17. Docker Compose
18. Docker Swarm
19. Kubernetes (K8s)
20. Helm Chart
21. Terraform
22. Ansible
23. ArgoCD
24. Grafana
25. Prometheus
26. Elasticsearch
27. Logstash
28. Kibana
29. Nagios
30. ArgoCD
31. CircleCI
32. Sonarqube
33. Kafka
34. Redis
35. Chef
36. Puppet
37. Saltstack
38. Cloudflare
39. Github Action
40. DevSecOps
41. MLOps

AWS Services

42. IAM
43. EC2
44. Elastic IPs
45. S3
46. Glacier
47. RDS
48. Elastic Load Balancer
49. AMIs
50. Auto Scaling Groups (ASG)
51. Security Groups
52. VPC
53. CloudFront
54. Lightsail
55. Boto3
56. Lambda
57. AWS CLI
58. Elastic Beanstalk
59. SNS
60. SQS
61. SES
62. CodeBuild
63. CodeCommit
64. ECR
65. ECS
66. Fargate
67. EKS
68. CloudWatch
69. App runner
70. ACM
71. Route53
72. Cloudformation
73. Code Build
74. Code Pipeline
75. Code Commit
76. App Mesh

Azure Services

77. Virtual Machines
78. Azure Storage (Blobs, Tables, Queues)
79. Virtual Networks
80. Load Balancer
81. Application Gateway
82. Active Directory (AAD)
83. AD Connect
84. AD B2C
85. RBAC
86. Security Center
87. SQL Database
88. Cosmos DB
89. Azure Functions
90. Logic Apps
91. Azure Monitor
92. Log Analytics
93. Application Insights
94. Azure Policy
95. Resource Manager Templates
96. Azure Boards
97. Azure Pipelines
98. Azure DevOps

GCP Services

99. Compute Engine
100. Kubernetes Engine
101. App Engine
102. Cloud Functions
103. Cloud Storage
104. Cloud SQL
105. Cloud Spanner
106. Cloud Bigtable
107. Firestore
108. VPC and Subnets

Note: Based on the market trend in DevOps we may add or remove services during the course.

109. Cloud Load Balancing
110. Cloud DNS
111. Cloud CDN
112. Cloud NAT
113. IAM
114. Identity-Aware Proxy (IAP)
115. Identity Platform
116. KMS
117. VPC Service Controls
118. Stackdriver Monitoring and Logging
119. Deployment Manager
120. Cloud Build

Note: Based on the market trend in DevOps we may add or remove services during the course.
